RVUSA E-Mail Setup – General Server Settings

These are general settings used to setup any email client software or wireless device such as a smartphone or tablet.

Incoming Server Settings

- **Type:**   POP3 or IMAP*
- **Server Hostname:**   pop.rvusa.com
- **SSL:**   Yes, enable it.
- **Port:**   995 (POP) or 993 (IMAP)
- **Username:**   Full Email address
- **Password:**   Password for the email account.

*The IMAP (aka IMAP4) email retrieval method provides a live view of your mailbox on our servers. Any changes from message read status, moves or deletions will synchronize between your computer/devices and our email servers. You will be limited by the mailbox storage limit of your email account on our servers which by default is 1GB.

Outgoing Server Settings

- **Type:**   SMTP
- **Server Hostname:**   smtp.rvusa.com
- **SSL/TLS:**   Yes, enable it.
- **Port:**   587 or 465
- **Username:**   Full Email address
- **Password:**   Password for the email account.
- **Server Requires Authentication:**   Yes
